## SUMMARY

---

**React Native** Developer with 3+ years of experience in designing and developing cross-platform mobile applications. Skilled in building clean and intuitive UIs, integrating RESTful APIs, and implementing scalable architectures. Proficient in React Native, Redux, Firebase, and TypeScript, with hands-on expertise in app deployment to both iOS and Android app stores. Experienced in performance optimization and debugging to deliver smooth user experiences..

## SKILLS

---

Mobile App Development: **React Native (CLI Expo)**

Languages : **JavaScript(ES6+), TypeScript**

Tools / Software : **Android Studio, xcode, Github, Flipper, Postman**

State Management : **Redux, Context API**

APIs : **Axios , Fetch**

Mobile App Deployment: **Google Play Store, App Store**

Libraries : **React, React Navigation, Firebase, React Native Paper,**

Soft Skills : **Problem-Solving, Team Collaboration, Communication, Time Management**

## EXPERIENCE

---

### **Stammp Technologies Pvt. Ltd.**

01/2025 – Present

#### *React Native Developer*

- Developing scalable mobile applications for Android and iOS using React Native Expo.
- Integrated Stripe Tap to Pay and NFC-based features to enable secure and seamless payment solutions.
- Utilized React Navigation for smooth in-app navigation and user flow.
- Migrated an existing React Native CLI project to Expo, improving development efficiency and simplifying build and deployment processes
- Learned and implemented Next.js, ORM Prisma, and supabase Database and Make API with integrate Mobile and web Application

### **Jstechno Solutions Pvt. Ltd.**

08/2023 – 12/2024

#### *React Native Developer*

- Developed and worked as part of a development team to build and enhance cross-platform mobile applications using React Native CLI.
- Implemented Redux for state management and integrated Firebase services to improve app functionality.
- Upgraded React Native version for existing projects, ensuring compatibility with the latest libraries and features.
- Assisted and guided junior developers by providing technical support, code reviews, and problem-solving strategies.
- Improved application performance by debugging issues, optimizing code, and reducing app load times.

- Designed and developed ready-to-use mobile app UI templates across various categories (similar to CodeCanyon products).
- Built reusable components and maintained a scalable screen and component structure for faster development.
- Contributed to mobile app development using React Native and created web interfaces with React.js.
- Gained hands-on experience in modern front-end technologies including React Native, React.js, HTML, and CSS.

## PROJECTS

---

### Lechalo App

- \* Technologies used - **React Native, Redux, Firebase, Google Map**
- \* Developed a dual-role mobile app for Customers and Drivers, offering services similar to Ola and Rapido. Customer Features: Book rides, send parcels, track bookings in real time, and manage payments through an integrated wallet system. Driver Features: View nearby requests, bid on delivery or ride fares, and accept or reject bookings based on availability. Integrated live GPS tracking, route mapping, and real-time location updates using Google Maps API. Enabled push notifications for ride status updates, request approvals, and delivery confirmations. Implemented secure login, role-based dashboards, and a transaction history system for both users.
- \* **Demo link**

### Jetvvx App

- \* Technologies used - **React Native, Redux, Firebase, zegocloud, Flipper**
- \* Built a feature-rich social media app similar to Instagram Reels using React Native and Firebase, supporting video sharing, user profiles, follow system, and real-time chat. Implemented follow requests, approvals, and notifications for seamless user connections. Developed live streaming functionality with support for joining streams and sending virtual gifts. send stream joining request and accept.
- \* **Demo link**

### PTRB Fitness app

- \* Technologies used - **React Native, Redux, Firebase**
- \* Designed and developed a cross-platform Fitness Mobile App using React Native, enabling trainers and trainees to manage fitness programs, track progress, and communicate in real time. Built role-based profiles for users (trainer and trainee), allowing personalized dashboards, account management. Implemented real-time chat functionality between trainers and trainees. Integrated form handling for daily check-ins, and displayed visual progress using charts and data visualization libraries
- \* **Demo link**

## SplitSum App

- \* Technologies used - **React Native, Redux, Stripe**
- \* Developed a custom stripe Tap to Pay, POS interface integrated with Stripe, designed for businesses to automatically split customer payments between the business and independent contractors in real time. Contactless payment integrations supported NFC devices.
- \* **Demo link**

## Labh Creation

- \* Technologies used - **React Native, Redux, Stripe**
- \* A mobile app for event management, specifically designed for bouncers during Navratri. The app allows users to scan tickets for entry, streamlining the check-in process and ensuring a smooth event experience.

## EDUCATION

---

**Shree H.K. Parekh College of Management, Mahuva**

2014-2017

*Bachelor of Business Administration (BBA)*

Mahuva, Gujarat

**Shri J. A. Sanghavi High School**

2014

*HSC - Commerce*

Rajula, Gujarat
